Data Engineer

Education & Certifications

Indiana University | Luddy School of Informatics, Computing, and Engineering

B.S. Degree, Data Science | Minor: Computer Science | 3.64 GPA

Honors: Dean's List for the Luddy School, Dean's Scholarship, Luddy Dean's Academic Merit Scholarship

Certificates: AWS Cloud Practitioner

Bloomington, IN

EGD: May 2026

Relevant Work & Project Experience

Data Analyst | Indiana University Office of School Partnerships, Bloomington, IN

June 2024-Present

- Built an interactive, layer-controlled map of Indiana high schools engaged with IU programs using Collaboratory (IU engagement database) API data, supporting leadership insight into geographic coverage and partnership reach.
- Delivered executive-ready visualizations, including a poster for campus leadership strategic planning.
- Led large-scale data standardization by adding unique state education identifiers across school and district records, improving data integrity, relational joinability, and downstream reporting accuracy.
- Designed school and district data schemas and scraped IDOE datasets to support scalable external data integration.
- Established data entry protocols and tagging standards to ensure consistent reporting and long-term analytical usability.

Enterprise Architecture Internship | Tenneco, Northville, MI

June 2025 – August 2025

- Cut SAP audit reporting time by 98% (1 week → 30 minutes) by developing a scalable bot in Automation Anywhere 360, eliminating 40+ hours of manual work per report and significantly reducing the potential of human error.
- Enabled plain-English data queries by designing and deploying a GenAI-powered knowledge base with Amazon Bedrock, improving data accessibility across teams and reducing dependence on SQL expertise.
- Delivered cost-effective AI solutions, such as an in-house meeting transcript summarizer and an intelligent feedback responder that performs sentiment analysis and automatically escalates negative reviews to proper teams.
- Streamlined workflows by integrating systems using Azure Logic Apps and related tools to improve contract visibility and renewals.
- Provisioned AWS cloud infrastructure with Terraform (EC2, RDS, Redshift) and developed interactive Power BI dashboards to transform raw data into actionable business insights for stakeholders.

Programming | Referee Schedule Builder, Naperville, IL

June 2024- July 2024

- Developed a referee scheduling optimization tool to streamline assignment selection across multiple assignor groups.
- Integrated multiple external APIs to aggregate game data into a unified scheduling and comparison tool.
- Designed a scheduling algorithm to maximize the number of feasible referee assignments within user availability, accounting for game times, travel distance, and transition feasibility between locations.
- Cut scheduling time by 2 hours a week and increased earnings by 20% through automated recommendations.

Software Development | Tranquility App, Bloomington, IN

April 2024- May 2024

- Built a native iOS application in Swift delivering a customizable ambient-sound experience through a sleek, intuitive user interface.
- Led the end-to-end app development lifecycle, from requirements and UML-based design to implementation and deployment.
- Implemented a modular audio mixer enabling users to blend ambient sounds to create personalized soundscapes.

Technical Skills

- Programming & Scripting: Python, Java, R, Swift, HTML, SQL, GitHub
- Data Science & ML: Pandas, NumPy, scikit-learn, Data Visualization (Tableau, Power BI)
- Cloud & DevOps: AWS (EC2, RDS, Redshift, Bedrock, etc.), Terraform
- Data Engineering: Data Pipelines, Databases (PostgreSQL), Data Scraping, API Integration
- Software Development: Mobile App Development (Swift), Web Development
